

vSEC: CLOUD[®]

Managed service of award-winning vSEC: CMS

With vSEC: CLOUD, Versasec offers easier deployment, predictable costs, and worry-free management, so customers can focus on their core business. Sign up today and enjoy the award-winning credential management system, managed by the Versasec team.

Reaching Your IAM Security Goals

Dependable Digital Credentials

Deploy credentials according to user-risk profiles and managerial roles, choosing modern MFA. Lower complexity and increase ease-of-use for IT administrators and business users.

Accelerate Deployment

Step-by-step migration, third-party integrations, and configuration guides available. Use Versasec Premium Support team for troubleshooting, guidance, and to quickly build up knowledge. Subject-matter experts ready via several communication channels.

Focus On What Matters

Scale with your growing business and ever-changing security requirements. Predictable costs with subscription-based pricing. Allow your workforce to focus on your business innovation and strategic goals.

“vSEC: CLOUD is all about our customers. New and existing customers are looking for a way to scale quickly as they and their use cases grow, while maintaining the highest level of security at predictable on-going costs. Our security credential management service, vSEC: CLOUD, offers exactly that. The maintenance, upgrades, incident handling, it's all managed by my team.”

Ellen Thorén, Head of vSEC: CLOUD Operations
